Less admin. Same team.

AI agents that handle your repetitive workflows — follow-ups, scheduling, data entry, reporting — so your people focus on what actually grows the business.

WHAT WE TAKE OFF YOUR PLATE

- **Customer follow-ups and lead nurturing**
  Prospects no longer fall through the cracks. Agents follow up on your behalf, send reminders, and move leads along — without anyone on your team lifting a finger.
- **Appointment scheduling and reminders**
  Bookings confirmed automatically. No-shows reduced. Cancellations filled. Your calendar stays full without anyone managing it hour by hour.
- **Data entry, reporting, and reconciliation**
  Numbers pulled, formatted, and filed automatically. Weekly reports ready before you need them. No manual spreadsheet work, no transcription errors.
- **Invoice chasing and payment reminders**
  Cash flow improves without awkward calls. Agents send polite, timely payment chasers on your behalf — consistently, every time, without the discomfort.
- **Client intake and onboarding**
  New clients are handled from first inquiry to onboarded — forms, welcome messages, document collection — without consuming your team's time.

THE REAL COST OF DOING IT MANUALLY

A typical 5-person business spends 40+ hours a week on tasks that don't require human judgment — copying data, sending reminders, chasing responses, filing information. That's equivalent to one full-time salary going toward work any agent could handle.

That time doesn't come back. Automating it does.

15+ Hours/week saved per typical client in year one	**24/7** Workflows running while your team sleeps
$0 Extra headcount. No new hires needed.	**3 wk** Typical time from first call to first live workflow

WHO WE WORK WITH

Professional Services
Accountants, consultants, advisors, agencies

Health & Wellness
Clinics, physio, dental, med-spa, coaching

Trades & Home Services
HVAC, plumbing, electricians, contractors

Retail & E-Commerce
Local retailers, Shopify stores, wholesale

THE HONEST QUESTION

How many hours this week did your team spend on tasks that anyone — or anything — could have done just as well?

Most small businesses are one or two broken processes away from having capacity they don't know exists. We find those processes, automate them, and give your team the hours back.

WHY BUSINESS OWNERS CHOOSE US

- **We don't sell you software** — we run everything, end to end.
- **Canadian-registered company** — we understand your business context.
- **Flat monthly fee** — no usage surprises, no per-seat billing, no hidden costs.

> *"The businesses that win aren't always the biggest. They're the ones that stopped spending Tuesday afternoons on things that didn't need a human."*

HOW IT WORKS

1. **Free discovery call — we map where time is lost**
We ask about your daily operations and identify the 2–3 workflows eating the most time. No setup, no software, no commitment. Just a conversation about your business.

2. **We build and test your first workflow**
Scoped, priced, and deployed — typically within three weeks. You review it before it goes live. Nothing runs until you're confident it reflects how you want your business to operate.

3. **It runs — you see the time savings immediately**
Agents run continuously in the background. Your team gets the hours back. You see the volume handled and the time recovered within the first month.

4. **We manage everything — you expand what works**
Monitoring, tuning, and updates are handled by us on a flat monthly retainer. Additional workflows are scoped and added based on what you've already proven delivers results.

ENGAGEMENT STRUCTURE

Setup & First Workflow
FIXED FEE

Discovery, scoping, build, and go-live for your highest-priority workflow. Quoted before any work begins — no surprises.

Ongoing Management
MONTHLY RETAINER

Monitoring, tuning, and updates included. Flat monthly fee — no usage charges, no per-seat billing, no AI team required on your side.

Additional Workflows
PER PROJECT

Each additional automation is scoped and priced individually. You only add what makes sense based on measured outcomes from prior work.

WHAT A TYPICAL MONTH LOOKS LIKE

Before

Your team spends Monday mornings manually following up on last week's inquiries. Two slip through. One books a competitor. A third ghosts because the response was too slow.

After

Every inquiry receives a response within minutes. Follow-ups run on a schedule. Your team sees a queue of warm leads — not a backlog of missed ones.

Before

Friday afternoon: someone on your team is manually building this week's report from three different spreadsheets. It takes 90 minutes and is always at least a little wrong.

After

The report is in your inbox Thursday morning, formatted correctly, pulled from live data. That 90 minutes goes back to your team every single week.

READY TO GET THE HOURS BACK

Start with a free 30-minute call.

Tell us the one workflow eating your team's time most. We'll show you what an agent could do with it, what it costs, and what you'd get back — before any commitment is made.
